Kendriya vidyalayan ,bhilwara, Rajasthan
06/2015 - 04/2016,   *CBSE **59***%

10th Boards
Adarsh Vidhya Niketan ,bhilwara, Rajasthan
06/2013 - 07/2014,   *RBSE**88***%

Projects

Text_utils :
- In this project I have developed a website in which we can do customization with text.
- for this website I used react and host on github.
- https://ankursanadhya.github.io/TextUtils/

School Fees Management:
- For front end I used **HTML-5, CSS** and **JavaScript** concepts.
- For backend I used laravel Framework for user authentication, Fees status and set reminder for remaining fees for students.
- This also show total income and expense of institute.
- This system also keep track on salary of employs.

Eye Tracking system :
- Created user interactive eye-tracking game using **python** library by taking help from online resources and Python Documentation.
- By this I can control cursor by using our eye ball

Face-Recognition:
- In this project I have developed a code in which we can set our **face to unlock device**.
- GitHub link:
  https://github.com/ankursanadhya/face_recognition

Text-to-speech:
- In this project I develop a code in which we can convert any text to our own voice
- After recording of our voice this program will automatically change text to speech.
  GitHub link:
  https://github.com/ankursanadhya/text_to_speech
